EXPERIENCE

Frontend Engineer

Getkart India Pvt. Ltd.

10/2021 - Present

New Delhi

Getkart is an American product-based company currently resides in India and creating new edge social media application known as **Pickzon**.

Responsibilities

- Led development of a cutting-edge social media web platform using **React.js**, **MUI**, **Socket.io**, **Redux-Toolkit**, **Axios**, and **React-router**, serving millions of daily users.
- Integrated **Razorpay** for seamless payment processing and implemented an ads dashboard using Recharts & React Hook Form, providing actionable user insights and product monitoring.
- Incorporated **Agora Web SDK** and **Ant-Media streaming services** into the web platform, enabling robust live streaming capabilities for hosts and real-time monitoring in the admin panel.
- Spearheaded migration of company website from React v16 to v18, focusing on **SEO optimization**, dark theme, animations and dynamic content management. This resulted in a significant performance boost, with Lighthouse ratings improving from **55% to 96%** across key performance and SEO metrics.
- Developed an admin dashboard using **Next.js**, facilitating efficient control and management of user/creator actions while implementing comprehensive CRUD operations for application data handling.
- Architected multiple **REST APIs** using Node.js and MongoDB to support static webpages on both website and mobile applications, incorporating role-based authorization for enhanced security.
- Engineered a suite of global reusable components for admin panel modules, leveraging Context API to streamline data search, filtering, and sorting functionalities. Developed specialized components such as autocomplete and image/video sliders with magnification features.

EDUCATION

Bachelors of Vocation

Dayalbagh Educational Institute - Agra

2016 - 2019

8.53 SGA

SKILLS

Javascript

ReactJs (v18)

CSS3

NextJs (v14)

HTML5

MUI (v5)

Redux-Toolkit

Socket.io

Axios

React-router (v6)

TailwindCSS / SASS

NodeJs

MongoDB

Framer-Motion

GIT

Typescript

Agora (Streaming)

PROJECTS

MERN-auth project [🔗](#)

- MERN project for authentication and save cookies at client side by backend api's.
- Using react-vite with redux-toolkit and node with jwt, bcrypt & nodemon.
- Link : [MERN-auth github](#)

Nike Landing Page

- Responsive website landing page in ReactJS and TailwindCss.
- Link : <https://nonish.github.io/nike-landing-page-tailwindCSS/>

Next.js Dashboard (v14) [🔗](#)

- Fullstack App in NextJs with **Server actions** and **Next-Auth** for authentication
- Link : [Next.js Dashboard](#)

Portfolio Website (Next.js 14 & Framer-motion) [🔗](#)

- Create personal portfolio website using NextJs, Framer-motion and TailwindCSS
- Also deployed with vercel : <https://portfolio-nonish.vercel.app/>

Whiteboard_App [🔗](#)

- A real-time shared visual collaboration on whiteboard application.
- Link : [Real-time whiteboard app](#)
